Mr. William K. Reilly, EPA Administrator
401 M Street, S. W.
Washington, D. C. 20460

Dear Mr. Reilly:

I recently solicited information concerning HiTec 3000 from the Ethyl Corporation and after reading the material feel convinced that The EPA give serious consideration to its use.

After more than 10 years of use in Canada and the amount of testing conducted by the Ethyl Corporation it seems to have been fully documented as to its positive results.

The idea of saving about 30 million barrels of oil a year as well as reducing harmful automobile emissions in the air greatly appeals to me as an American - put that world citizen - concerned about the environment and its resources.

Please weigh the evidence carefully.

Yours truly,

George W. Kluge
